

MEET:

Victoria Nakazibwe

AGE: 20

I was born in Mityana, Uganda and I'm a first born of my father and mother who separated after I was born. Due to their separation, I'm an elder sister of four girls on my father's side and an elder sister of one girl and two boys on my mother's side.

WHAT IS YOUR FAVORITE PART ABOUT THE KAIROS PROGRAM?

My favorite part about the program is mentorship. Through mentorship, I have someone I now consider very important to me. She is someone who is ready to listen to me and guide me in whatever I do. She sees my mistakes and helps me find the way forward. This has indeed set my heart free.

WHAT IS SOMETHING THAT YOU ARE PROUD OF?

I have been able to strengthen my relationship with most people I had put far away from me which has really made me proud. My mentor guided me through this and helped me to value these relationships more. My relationship with my father has improved greatly because of my mentor challenging me.

WHAT WERE YOU DOING BEFORE KAIROS?

I had completed high school and applied to different businesses which had all not succeeded. I finally found some work, but the job did not last long and I was laid off from work. It was hard for me to find another job and so I spent most of my time at home helping my auntie with chores.

WHAT ARE WAYS YOU'RE LOOKING TO GROW IN THE PROGRAM?

I would like to grow in making strong personal relationships. I now know it's important to have people in your life. I have always struggled with making friends and keeping friends, and I want this to change.

H O B B I E S

I'm passionate about helping those in need and I love seeing everyone happy. This started when I was in my high school and could at least share the little my parents could afford to give me with those who had nothing at all at school. I hope that I can use the skills that I will attain in mechanics to help people.

D R E A M S

When I graduate, I want to become a mechanic. It has always been my passion. I am convinced that through hard work and cooperation as well as openness to learn, I'm going to make a good use of this chance given to me by Kairos and attain the basic skills needed to achieve my goal. I want to get a job as soon as I graduate so that it helps me get more exposure and experience but am also going to be intentional about saving so that one day I can open up my own garage.
